

PROFILE

01 — Introduction

Trained in graphic design, I build products with AI-assisted development: BitSugar & OnBoard, both live — designed and built end-to-end solo; plus a self-taught full 3D pipeline. Plan first, build second — I turn ideas into usable products fast.

BIRTH

2004.09 • Age 22

STATUS

Fresh graduate • 2026

AVAILABILITY

Immediate • Shenzhen

Wuhan Engineering Polytechnic Advertising Art Design (Associate) Outstanding Graduate 2023.09 — 2026.06

AWARD

2025 Hubei Vocational College Skills Competition • Digital Art Design — 2nd Prize

PROJECTS

02 — Selected Works

no.01 BitSugar — Perler Bead Pattern Website ORIGINAL • LIVE WEB / AI-ASSISTED

- Free public site live at bitsugar.top: product design, AI-assisted development, domain/DNS/deployment/SEO — all solo

no.02 OnBoard — 3D Material Previewer (Web App) ORIGINAL • LIVE WEB / AI-ASSISTED

- Live at onboard.wang: real-time material & decal editing — decals slide freely across UVs; intensity/contrast/tiling/rotation adjustable
- Real-time sky, atmosphere & HDRI (fully parametric); custom import of models, materials, decals; project export

no.03 MetaHuman Costume — Full Asset Pipeline ORIGINAL • AI-ASSISTED BLENDER / UE5 / SP

- Protagonist asset for my game Flight 404: AI-assisted head & costume high-polys, converted to a MetaHuman head
- Costume topology and texturing in Blender; normals baked to a game-ready low-poly; assembled in UE5 as a MetaHuman outfit with working animation

no.04 Scarab Sphere — Excavation Site (UE5 Short) REFERENCE RECREATION UE5 / BLENDER / MD / AE

- High-fidelity recreation of an ArtStation concept, rendered as a cinematic short: hand-sculpted terrain in UE5; manually reworked material nodes on mismatched assets; the core sphere's sci-fi material built from scratch with Blender procedural nodes
- Military canvas tent via Blender × Marvelous Designer cloth simulation, snow-cap material in UE5; modeled the scene's missing small props; color-graded in After Effects

INTERNSHIP

03 — Internship

Video Editing & Graphic Design Intern • Xiangchi Sporting Goods

2026.07 — 2026.09

- Shot, edited and color-graded product videos for the brand's Douyin account
- Independently designed 4 roll-up banners for offline stores (delivered); wrote one brand color proposal

TOOLBOX

04 — Skills & Tools

WEB & AI

AI-assisted development (2 products • both live) • AI-assisted modeling pipeline (METAHUMAN) • domain / DNS / deployment / SEO submission

3D

UE5 scene • terrain • blueprint • material • METAHUMAN • game demo dev / BLENDER modeling • procedural materials • topology • baking / MARVELOUS DESIGNER cloth / SUBSTANCE 3D PAINTER high/low-poly baking • texturing / ZB sculpting / 3DS MAX

GRAPHIC & VIDEO

PS • AI • PR • AE color & compositing • AU • RESOLVE • XMIND planning
